Medimax ICFMR Cost Reporting
Potential Issues and Proposed Solutions

Issue	Solution
1. **Page 3, Line 1, column 5** – Compensation amounts input may not appear on the screen	1. Print page 3 to ensure correct compensation is reported Note: Zero should be report if none.
2. **Page 3, Line 2, column 1** – Once selected, you must choose one of the four options	2. Manually correct on printed copy
3. **Page 3, Line 3, column 1** – Words may be misspelled (ex. None will be oNne)	3. Correct on the screen and retry. If screen entry can't be corrected, manually correct on printed copy
4. **Page 10** – Columns (b) and (c) may not foot or crossfoot (especially when column b contains an adjustment	4. a) Re-print page 10 until information foots and crossfoots correctly. b) If a is unsuccessful, manually correct on printed copy
5. **Pages 12, 16, 17, 18b and 22** – No on-screen check totals	5. Print pages to ensure correct input
6. **Page 15, Lines 36a through 36d** – Line descriptions do not print properly	6. Manually correct descriptions of miscellaneous costs reported on printed copy
7. **Page 22** – Amounts may shift too far to the right when printed	7. Manually correct any amounts that did print on the printed copy
8. **Page 22, columns (g) & (h)** – May not calculate correct for all assets causing total to be incorrect	8. Manually correct amounts in columns (g) & (h) and totals
9. **Page 25** – Information input on the screen may not print	9. Manually correct missing data on printed copy
10. **Printing** – The cost report pauses while printing multiple pages	10. Press continue on printer
